Project Title : Censorship Detection in Censored Planet

Time Logs 2/10/2025 - 2/16/2025

Total Hours Accumulated Since Beginning:

13 Hours Accumulated in this period

38 Hours Accumulated in total

Date	Duration (hours)	Category	Description of completed task	Challenges and/or next steps	Reflection
2/10/25	1	Meeting	Had meeting with professor and spoke about what should be done on the project, asked questions and took notes during this meeting	I would like to come up with more questions regarding about what to exactly do in the 4900 course	Go over notes during this meeting
2/11/25	2	Analysis	Reorganized all of my notes and continued to summarize some concepts	I would like to ask more questions for my Supervisor about some topics	
2/12/25	1	Documentation	Worked on required diagrams for 4900	I would like to present these diagrams to my supervisor if any changes are needed	
2/13/25	2	Documentation	Continued to work on the required diagrams for 4900		
2/14/25	2	Documentation	Continued to work on the required diagrams and started working on slides	I would like to present these slides to my Supervisor if it is in the right direction	Will need to update these slides in the future with a log file
2/15/25	3	Documentation	Continued to work on slides		
2/16/25	2	Documentation	Reformatted my slides so it is coherent and readable		

Reflection

What were your main goals in this time period?

The main goals during this time period was mainly focusing on completing the required documentations such as diagrams and slides.

What were the main challenges during this phase? Were you able to meet the challenge, if so, what helped? If not, what could help?

The main challenge during this phase was to complete the required diagrams such as the data processing diagram. I was able to meet this challenge because I was able to break the problem down based on the research paper. I was able to come up with a solution for processing raw data. In the coming days I would like to go over these documents including the slides with my Supervisor and get an opinion on it so I can work on updates if needed I will have a change log for this as well. My goal for the next steps is to be able to come up with an efficient solution for processing raw censorship data events in a more efficient approach where I can classify the data into different groups and I will continue to work on this.
