Reflection

What were your main goals in this time period?

The main goal in this time period was finalizing the project and making sure the project is ready for submission.

What were the main challenges during this phase? Were you able to meet the challenge, if so, what helped? If not, what could help?

The main challenge during this phase was to complete the final deliverable project and making sure everything was organized. I was able to meet this challenge because I followed the rubric that was provided in the deliverable, and I made sure my slides were well organized, structured and had as many details as possible. I also made sure my video recording was well put together.
