## Reflection

*What were your main goals in this time period?*

In this time period my main goals were to really understand concepts in the research paper as I was having difficulty in understanding concepts that came about.

*What were the main challenges during this phase? Were you able to meet the challenge, if so, what helped? If not, what could help?*

The main challenge during this phase was to understand concepts that were presented in the research paper. I was somewhat able to meet the challenge as I got a better grasp on a few ideas,

but I wrote questions about the concepts and will present with a scheduled meeting to my Supervisor.
